

Hyder recently completed construction on Tony's Market, a locally owned specialty food market and restaurant. In June, Tony's Market celebrated the grand opening of their first Denver store, located in the Golden Triangle at 950 Broadway. The 15,000 square foot space includes a bistro with seating for 80, an outdoor patio and a market area specializing in high quality meats, cheeses and seafood. The project, which was completed ahead of a very tight schedule, stayed on track thanks to Hyder's ability to efficiently coordinate subs and the specialty kitchen equipment and our ability to maintain seamless lines of communication with the entire team.

Hyder Construction is a Denver-based general contractor specializing in commercial construction. Hyder has served Denver, the Front Range, and mountain communities for over 60 years.
